**SOFTWARE
FOR
THE
IBM - PC**

Educational Software

It was a noteworthy achievement for our Software Development Department to meet its challenge: create the most sophisticated educational software for the IBM-PC. Make it powerful, comprehensive, and above all, make it easy to use.

BASIC Instruction Course

Never programmed before? Or maybe you're just tired of obscure, incomplete instruction manuals? Well, our BASIC Instruction Course is simple enough for the novice to understand, yet sophisticated enough for the teaching laboratory. Supplied on a two disk set, twelve easy to learn, self-paced modules cover BASIC and PC-DOS functions including:

- | | |
|--|--|
| ☐ DOS commands | ☐ Functions |
| ☐ Direct commands | ☐ FOR-NEXT loops |
| ☐ Print commands | ☐ Arithmetic operations |
| ☐ Input & Output | ☐ File handling |
| ☐ Arrays | ☐ Graphics |
| ☐ String handling | ☐ Subroutines |
| ☐ Arithmetic commands | ☐ Screen formatting |

Adjusting itself to your own learning speed, the Alphanetics BASIC Instruction Course is easy to use and easy to learn with.

PC-DOS, 64K, One Drive

\$39.95

Word Whiz

If you've been searching for an educational aid that is a fundamental learning experience, yet entertaining, then Word Whiz is your tool. Using the well-known flash card principle of instruction, this program has been specifically designed to increase your first through seventh grader's spelling proficiency. To maintain challenge and interest, the degree of difficulty automatically varies with number of correct/incorrect responses, while player statistics, sound and video enhancements add to the enjoyment of using this program.

With a vocabulary of over 1800 words, lessons for each grade are divided into three learning categories: Grades 1&2, 3&4, 5 & over. Word Whiz can also be used with "The Wiz", an Alphanetics utility program which converts Word Whiz into a teacher customized instruction program.

PC-DOS, 64K, One Drive

\$29.95

Super Whiz

Almost identical to the original Word Whiz program in operation, this program has a vocabulary chosen to challenge the high-school through college graduate. Intellectual, esoteric, and cerebral are a few words which describe this interesting program. If you want to increase your reading or spoken vocabulary, this program is for you.

PC-DOS, 64K, One Drive

\$29.95

The Wiz

The Wiz functions around the well known flash card learning process. Up to three lines of words & phrases are flashed on the screen, with a fourth line for the student's response. The three line sets are entered by the instructor, along with the expected response. Time of display is fixed or set to vary according to number of correct responses. Capacity of approximately 80,000 characters is available per lesson set. Teacher or student may select from a menu of available lessons, and the program stores such statistics as student name, time spent on lesson, percent correct, all in a "teacher only" accessible file. Sound and video enhancements add entertainment value to this thorough learning experience.

PC-DOS, 64K, One Drive

\$69.95

States 'n Caps

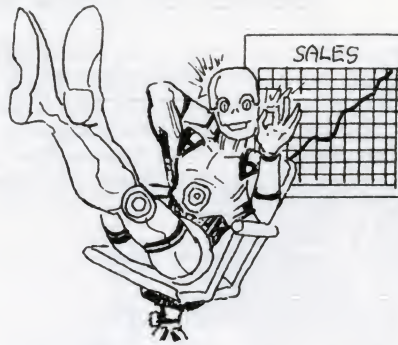

States 'n Caps is a graphic learning program which is designed to assist children (or adults!) to quickly learn America's states and capitols. Informative and lots of fun, high-resolution graphics, sound, and excellent detail disguise a very slick learning experience. Extensively tested on children of all ages, States 'n Caps utilizes an interactive programmed learning format. Quizzes by state, capitol, or states and capitols are offered. Provides scores and elapsed time, while prompting with correct answers. Lots of fun for all at home, or in the classroom!

Requires Color/Graphics Board
PC-DOS, 64K, One Drive

\$29.95

Business Software

You've decided on the IBM-PC because of its quality, expandability, and superior capabilities. Now how will you go about taking advantage of all that power at your fingertips? With efficient & versatile business software from Alphanetics. All our business software is fast, accurate, and most importantly, it's human engineered. That means you won't be searching for the instructions with every entry because your computer let's YOU know what you should do next. The way we figure it, why not leave the hard work for the machine?

Business Pac I

With a wide assortment of programs designed to handle many day-to-day business problems, this impressive package consists of 15 menu-driven programs including:

- ☐ Term of a Loan
- ☐ The Rule of 78's
- ☐ Asset and Depreciation
- ☐ Growth Rate & Projection
- ☐ Cashflow Analysis
- ☐ Decision Maker
- ☐ Return on an Investment
- ☐ Stock Analysis
- ☐ Loan Status
- ☐ Lease/Buy
- ☐ Program Evaluation and Review Technique (PERT)
- ☐ Apportionment by Ratio

PC-DOS, 64K, One Drive

Auto Dialer

Have you ever found yourself looking for someone's phone number you just KNOW you saved in that drawer... somewhere? Well, clean out your desk and stop searching through your notes for that missing number. With Auto Dialer acting as your personal or business telephone database, not only will your IBM-PC store all your phone numbers for you, it will interface with any Hayes Smartmodem to automatically dial it at a touch. Storing over 1800 names and numbers on a double-sided diskette for instant recall, you can search for any entry with just a portion of it's description, or breeze forwards and backwards until you spot what you were looking for.

- ☐ Alphabetizes names
- ☐ Comment field for notes
- ☐ Prints out a master directory
- ☐ Stores and dials using your MCI or SPRINT number
- ☐ Single keystroke dialing
- ☐ Outside line access codes
- ☐ Fast and convenient data entry, change or delete

Now if only you could find that address book...

Requires Hayes Smartmodem
PC-DOS, 64K, One Drive

\$39.95

Mailing List I

With quick and easy data entry, our popular mailing list program features an unlimited number of entries, and sorts up to 2000 entries on a single, double-sided disk. Boilerplate entries allow you to repeat any field from the last entry entered with a single keystroke. Able to search and find any entry within 3 seconds, this mailing list incorporates features of programs costing 4 to 10 times as much, including:

- ☐ Fast machine language sort by any field
- ☐ Select/de-select of entries by field
- ☐ User specified sort field for quick entry, search and edit
- ☐ Select/de-select within a range
- ☐ Select/de-select field
- ☐ 10 digit zip codes
- ☐ Phone number and "attention" fields
- ☐ Number of labels to print
- ☐ Number of labels across the page
- ☐ Attention/date field, optionally printable
- ☐ Print within range of sort field, zip codes, addresses, attention/date field, and names
- ☐ Print only newest entries

Mailing List I will print single or double width labels on the Epson or IBM printers. Single keystroke commands and crystal clear prompting enhance this user friendly program and make it extremely easy to use. This program has been designed so that you, the operator, is always in full control while using a minimum of keystrokes to accomplish any task.

PC-DOS, 64K minimum, One Drive

\$39.95

Micro Minder

At work, ever miss a crucial committee meeting because you misplaced your appointment book? Or at home, did you ever forget a loved one's birthday? Never again, because Micro Minder will be your personal reminder, calendar, and weekly organizer. Micro Minder is a professional appointment scheduler/database, ideal for any medical office, service organization, or active dating single person.

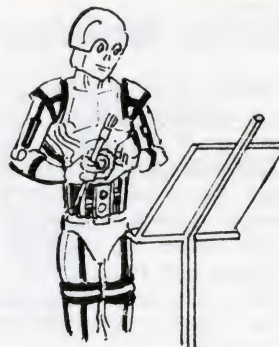

Find any appointment within 3 seconds - it's that fast! Full appointment list and calendar to printer or screen. Has on-screen clock, with graphic monthly calendar for quick reference. Micro Minder replaces your cumbersome appointment book once and for all, to keep you on time and on schedule.

PC-DOS, 64K, One Drive

\$39.95

General Interest

Now it's time to relax, and enjoy some of the lighter capabilities of your computer. Alphanetics has an assortment of software that will entertain. Create an exciting work of art, take an erotic escapade, or save your failing car company from bankruptcy. You'll find hours of enjoyment in each of these packages.

Video Etch

Imagine a graphics editor which allows you to easily create and save on diskette high-resolution color graphics line "etchings." Also imagine that these etchings can be output to your printer (only the Epson MX-80/IBM Printer with GrafTrax option) for framing or hard copy storage. You've just imagined Video Etch, an incredibly versatile program employing many single-keystroke graphic primitives offering such features as:

- ☐ Single dot, multiple dot drawing or erasing
- ☐ Selectable line length drawn/erased per keystroke
- ☐ Automatic box, rectangle or circle generation
- ☐ Palette and color selection
- ☐ Multiple Colors
- ☐ Fill-in of drawn figures
- ☐ Single keystroke figure creation and erase
- ☐ Instructions available at any time during drawing
- ☐ Draws, erases best fit line between two points
- ☐ X-Y locations always shown for cursor location
- ☐ Dot, line or figure plotting by X-Y specification
- ☐ Load, save, overlay and directory of drawings
- ☐ Text insertion with color
- ☐ Large cursor with 8-single keystroke drawing directions

All drawings created can be very easily used by your own BASIC programs to enhance your presentation of information. Quick, efficient, and friendly single keystroke commands minimize the user's initiation time with the program. Video Etch has applications in engineering, drafting, education, graphic design, as well as creative entertainment! Many people describe using this program as very relaxing and aesthetically pleasing.

Requires Color/Graphics Board
PC-DOS, 64K, One Drive

\$39.95

U.S. Motors

Your automobile empire's stock is falling through the basement, bankruptcy is eminent. Do you think that your business savvy is enough to save the company? Will you be the next Lee Iacocca? Japanese imports and OPEC seemingly conspire against you, while a competitors' drug bust affects your future. Terms of government subsidies must be considered. Decisions related to these variables mean the difference between success... or failure! A realistic and timely simulation of a corporate financial environment.

PC-DOS, 64K, One Drive

\$29.95

Game Pac I

An anthology of 10 menu-driven games, including:

DUNE...An adventure inspired by Frank Herbert's best selling science fiction novels...
TIC-TAC-TOE...It's you against the merciless computer.
A-MAZE-ING...Guide yourself through a random maze a rat couldn't solve!
CARD COUPLETS...A popular version of that familiar old card-guessing game.
WWII BOMBER...You're at the controls of a B-52 bomber. Can you deliver your deadly payload?
HOWITZER...A medium res graphics enhanced bunker to bunker artillery challenge. Blow your best friends into sludge!
DICE...Turn your \$4000.00 computer into a pair of not-so-fuzzy dice.
NUMBER GUESS...Outsmart your dumb computer... beat Big Blue!
SCRAMATRIX...Scrambles your brains as well as words.
KING CYRUS...Rule your ancient kingdom wisely, but watch out for those revolting peasants!

PC-DOS, 64K, One Drive

\$29.95

Prosthesis

Do you think you're man (woman) enough to handle this adult adventure game? Based in a clinical setting in a gambler's city, you'll soon realize what a sure prescription we have for exciting. X-RAYted fun! Prosthesis is like many other adventure games played on personal computers, however the goal is a bit different... to enjoy yourself exploring the many chambered world of a somewhat unusual and eroticized hospital. Just let your computer be your guide. You'll be having such exotic/erotic fun, you may never want to quit - as long as you can keep it up. Just remember what your dad always told you about being careful, and you'll have a ball. Great fun at parties! You must state that you are over 21 years of age.

PC-DOS, 64K, One Drive
